

Psychology 244A: Cognitive and Language Development Fall 2004

Instructor: Nameera Akhtar, 313 Social Sciences II
nakhtar@ucsc.edu
Office hours: Tuesdays 2-4 PM

Class Meeting Times: Tuesdays and Thursdays, 10:00-11:45 AM, Room 104, Soc Sci. II

Course Description:

In this course, we will explore major theories and research in cognitive and language development. This is a survey course, which means that we will cover a selection of topics of interest in these two fields. It also means that we will have to leave out many theories and topics that are important! We will consider constructivist views, nativist views, and sociocultural views, as well as the views of many other theorists and researchers who are more difficult to categorize. Along with an introduction to different theoretical issues and views, we will explore aspects of the relations between thought (thinking) and language (speaking and understanding).

Course Requirements:

A. Class Participation

I expect you all to come to class prepared to discuss the readings. To help facilitate this, I will ask you to write short "reading responses" for each of the readings for each class. These should be turned in at the beginning of class. Make enough copies for me and your fellow classmates. You will also be asked to lead the class discussion of at least one of the required readings each week.

B. Paper

The required paper will be in the form of a research proposal on a topic **related to cognitive and/or language development**. This assignment will be most beneficial to you if it proposes a study that you are likely to carry out. For example, it could be a proposal of your first year project, or a proposal to study a cognitive developmental aspect of an ongoing research project in another area. A statement of your proposed topic along with a short list of relevant references is due at the beginning of class on **October 12th**. Then I would like to meet with each of you individually to discuss your ideas. A first draft of your paper (typed and in APA format) is due at the beginning of class on **November 4th**. I will return this draft to you with comments as quickly as I can. Each of you will present your proposal to the class in one of two workshop-like sessions on **November 16th and 18th**. The final paper is due at the beginning of class on **December 2nd**.

C. Exam

There will be a take-home final exam. The questions will be handed out on December 2nd. The exam is due by **5 PM on Tuesday, December 7th**.
