

TWO AS ONE

MAINTENANCE INSTRUCTIONS

GENERAL INFORMATION:

Two as One consists of three tabletops and a framework that holds two second-surface mirrors, and two prisms with polaroid filters. The mirrors, prisms and polaroid filters are glass and may be cleaned with glass cleaner; the rest of the exhibit may be cleaned with soap and water. The mirrors are hung from the top frames at three points by nuts loaded against springs. Access panels in the top of the frames allow adjustment of these nuts. To clean the polaroid filters, remove the flat head screw from the top of the prism holder and carefully pull on the black Delrin mask. When reassembling, the notches in the filters should face each other. The patterns that the visitors place under the mirrors are coated with frisket to reduce the reflections.
