Immerse your guests in a vibrant landscape of sights, sounds, and curiosities.

In the spring of 2013, the Exploratorium will move to its new location at Pier 15 on San Francisco’s Embarcadero. The new museum is divided into galleries filled with hundreds of exhibits, ranging from mechanical contraptions to artworks highlighting the beauty of the physical phenomena that surround us.

The galleries and theater will be available to rent individually or in combination. Please contact us for the most current information on pricing and availability.

Amy Adkins
Museum Rentals Manager
The Exploratorium @ Pier 15 is available for private event rentals beginning in the spring of 2013.

OBSERVATORY GALLERY & TERRACE
Exploring a Sense of Place: The City, Bay, and Sky
Breathtaking views of the city and bay, from both the Observatory Gallery and adjacent Terrace, make this an ideal setting for elegant seated dinners, cocktail receptions, or just about anything you can dream up!

EAST GALLERY
Discovering the Living World
With large windows overlooking the bay, the East Gallery brings the outside world in, with experiences and exhibits that let guests explore life at different scales. It’s perfect for intimate seated dinners, dancing, and receptions.

CENTRAL GALLERY
Investigating Natural Phenomena
Designed for exploring sights, sounds, and perception itself, the expansive Central Gallery features our physics and perception installations. It is well suited to strolling receptions or dining and dancing among hands-on exhibits.

WEST GALLERY
Understanding Cognition, Science, and Society
Closest to the Embarcadero and adjacent to the Theater, the West Gallery integrates exhibits on psychology and art. It’s great for seated dinners and evening receptions, product launches, alumni gatherings, and more.

THEATER
Seeing the World through New Eyes
State-of-the-art sound and projection make the Theater ideal for seminars, lectures, presentations, and film screenings. Adaptable to theater- or cabaret-style seating, this flexible space can be customized to meet your needs.

We’re building the new Exploratorium to be self-sustaining, with a net-zero energy goal.

- Solar panels will provide 100% of anticipated electrical needs
- High-performance glass windows will limit heat gain
- Bay water will provide heating and cooling via radiant floors
- Thermal roof insulation will help maintain internal temperature
- Roof runoff water will be filtered for use as gray water
- Museum components will include certified wood, low-emitting materials, and recycled elements
